I support Bill 10, because i strongly believe that it will positively influence Oahu. I do not think that it is rational to use so many plastic bags for such a short amount of time, and then just throw them away. Plastic bags are made out of oil: therefore if we reduce the amount of plastic bags, we would also be reducing our oil usage. Over reliance on oil is a problem that is in the process of being resolved, so banning plastic bags would bring us one step closer to a better economy.
